

**Enjoy continuous power with
Elliott Power Systems!**

Who knows when the next power-outage will occur...or why! High winds, ice storms, hurricanes, thunderstorms, even high-energy demands or utility repairs can knock out commercial power.

A quality EPS home generator set will keep you powered-up even in the roughest weather conditions, no matter how long the commercial outage lasts.

Sooner or later,
your home's electricity
will go out.

**STAY
POWERED UP
WITH
ELLIOTT
HOME
GENERATORS!**

Problem:

Power Outage

You're enjoying an evening at home with your family when -- without warning -- the lights go out. You wait a moment, thinking maybe the power will come right back on; but it doesn't! In the darkness, you fumble for a flashlight.

First you feel a mild annoyance -- no more TV, no more surfing the 'net, even the dishwasher has stopped mid-cycle. Then comes that sinking feeling: the phone is dead and your home security system is shut down, leaving your family vulnerable. What about all that costly food in your refrigerator and freezer? Will the power come back on before it spoils?

Solution:

Elliott

Elliott offers a complete line of home generator sets that keep your power on, no matter what! At the first hint of a power outage, your compact, high-performance generator automatically starts up through a UL listed automatic transfer switch. When commercial power is restored, your generator automatically shuts off. You never have to lift a finger -- or worry about whether the power will be out for minutes...or days!

Elliott Power Systems. A name you can trust!

Extensive factory testing has proven **Elliott Power Systems** to have one of the highest performance ratings of any home generator system on the market today! You can trust that quality and integrity have been built into every system.
